

THE HERMON SLADE FOUNDATION

GRANT APPLICATION FORM

Guidelines and instructions for completing the form

This Foundation was established in October 1995 by the generous benefaction of Mr George Hermon Slade AM. Its primary object is to "...advance and enhance the progress and harmony of mankind with the Earth through the study and application of Natural Sciences".

Believing that "...if there is a way better than another, it is the way of nature", Mr Hermon Slade has sought to encourage the pursuit of excellence in scientific research, particularly on topics which are designed to improve the ways in which individuals and communities interact with their natural environments.

In seeking to achieve this ideal, the Foundation's top priority is to provide support, on a competitive basis, for high quality research by scientists in Australian national or state institutions, and universities.

The Foundation seeks to complement, rather than compete with, other funding bodies. Experience has shown that modest support can be particularly effective if used as "seed money" to initiate projects, which may subsequently expand and attract major funding from other sources. Foundation grants have also supported specific components of large projects financed primarily by other agencies.

Typically the HSF provides project grants up to approximately A\$30,000 per year for up to three years. Grants are awarded to Australian institutions for activities within Australia. Occasionally activities located in countries of the south west Pacific may also be funded.

Grants are made in annual instalments, and payments are dependent upon the receipt of satisfactory, annual reports and financial statements. An additional progress report is required six months after the start of the project. Salaries of technicians and research assistants may be supported, but grants do not cover the salaries of scientific research staff or stipends of students. Administrative overheads are not funded.

Selection Criteria Please refer to the Hermon Slade Foundation website for details.

Completing the form

- This form is in Adobe Acrobat format.
- Formatted text may be achieved within the files by selecting text, right clicking and selecting the appropriate formatting.
- Use the tab key to navigate through the fields in the form.
- Special text such as tables, photographs and graphs may be submitted in a separate ANNEX, maximum length 2 pages. This special text together with the information required under Section (L) of the application form, should be combined into a single PDF file and submitted with the form.
- Please print the front page, have it signed by the institutional representative, and scan it.
- To limit the overall length of applications, some fields are limited in length, particularly in sections E & H. Text will not be able to be entered beyond the maximum length of these fields, or may not be visible if it goes beyond the bottom border of table cells.
- The completed application, consisting of:
 - The filled out form,
 - The signed and scanned front page, and
 - The ANNEX referred to above, should be emailed to bfilshie@apscience.org.au by the due date published on the website. Please note that mailed hard copies of the applications will no longer be required.
- Applications are confidential to the Research Committee. They may be referred to external referees on a confidential basis.
